Summary

Final-year **Computer Networks and Communications** student at UIT, VNU-HCM (GPA: 8.44/10, TOEIC: 805) with strong full-stack software development and AI engineering capabilities. Proficient in **Java (Spring Boot), Python (FastAPI), React, and Docker**. Proven track record of independently architecting multi-service web platforms, automated test suites, and CI/CD pipelines. Seeking the **AI Engineer Intern / Full Stack Developer Intern** position at TMA Tech Group to contribute to real-world project assignments and collaborate with Subject Matter Experts.

Education

University of Information Technology (UIT), VNU-HCM **Sep. 2023 – Present**
B.Sc. in Computer Networks and Communications *Ho Chi Minh City, Vietnam*

- GPA: 8.44 / 10 (Rank: Very Good) — TOEIC 4 Skills: 805
- Google IT Automation with Python (Coursera) — Introduction to Git and GitHub (Coursera)

Relevant Coursework

- Distributed Systems
- Parallel & Distributed Computing
- Database Systems
- Cloud Computing
- Software Engineering
- Computer Networks & Protocols

Technical Skills

Languages: Java (17), Python, TypeScript, JavaScript, SQL
Frontend: React 18, TypeScript, HTML5/CSS3, Responsive UI
Backend: Spring Boot 3.2, FastAPI, Node.js, Express.js, REST APIs, SSE Streaming, WebSocket, JWT
AI & Data Engineering: LangChain, LangGraph, RAG, Vector Search (Qdrant), Prompt Engineering, Ollama, MLflow
DevOps & Systems: Docker, Docker Compose, GitHub Actions (CI/CD), Git, Linux, Postman

Experience

ERA Group **Jul. 2026 – Aug. 2026**
Web Designer & Developer (Remote) *Ho Chi Minh City, Vietnam*

- Developed and customized responsive web applications using WordPress and modern web tools, integrating frontend components and digital assets based on client requirements.
- Implemented responsive layouts, integrated third-party forms and web APIs, and optimized cross-device compatibility.
- Managed end-to-end website deployment, domain configurations, and production updates for client deliverables.

Projects

Smart Document Chatbot — Enterprise Platform | *React 18, Spring Boot 3.2, FastAPI, Qdrant* | GitHub **May 2026 – Present**

- **Problem & Solution:** Solved enterprise document intelligence and legal Q&A challenges by architecting a scalable multi-service platform with multi-agent orchestration.
- **Engineering:** Connected React 18 frontend to Spring Boot 3.2 (Java 17) backend and FastAPI Python microservices; implemented token-by-token SSE streaming and Corrective RAG (CRAG).
- **Impact & Results:** Delivered automated test suites and CI/CD pipelines deploying to Cloudflare Pages and Render; achieved **96.8% retrieval accuracy** on 31 legal benchmark Q&As.

SupportDesk — AI-Assisted Customer Support System | *React, TypeScript, FastAPI, PostgreSQL* | GitHub **Aug. 2026 – Present**

- **Problem & Solution:** Eliminated customer support ticketing backlogs by building a full-stack platform automating classification and draft response suggestions.
- **Engineering:** Implemented React + TypeScript frontend, FastAPI backend, role-based JWT authentication, state-machine enforced lifecycles, and vector similarity retrieval.
- **Impact & Results:** Automated benchmark tests over 100+ tickets, reducing misclassifications by **30%** and optimizing automated routing to specialized departments.

CreditFlow — Financial ML Decision Platform | *React, Python, FastAPI, Scikit-learn, MLflow* | GitHub **Aug. 2026 – Present**

- **Problem & Solution:** Mitigated commercial credit default risks by architecting an end-to-end ML decision engine focused on business cost minimization.
- **Engineering:** Connected an interactive React dashboard to a FastAPI ML scoring pipeline with Human-in-the-Loop review workflows and MLflow experiment tracking.
- **Impact & Results:** Tuned optimal business default cost thresholds; verified pipeline stability via Population Stability Index (PSI) drift monitoring.
